Cathay

To Whom it May Concern,

I am writing to express my enthusiasm for the Graduate Trainee position at Cathay. Your pioneering work in advancing aviation technologies and commitment to enhancing the future of air travel particularly resonates with me, and I am excited about the opportunity to contribute to your team's success.

As a final-year Business Computing & Data Analytics student at Hong Kong Baptist University with First Class Honors, I have developed expertise in full-stack web development, database management, and machine learning through internships at organizations like Cathay Pacific and Wizpresso. My experience building scalable applications, optimizing system performance, and working with large datasets has prepared me well for the technical challenges at Cathay. I've also had the opportunity to lead cross-functional projects and communicate complex technical concepts to stakeholders, experiences that align well with the collaborative nature of your Graduate Trainee position.

Beyond technical skills, my academic journey has included research work on large language models and artificial intelligence applications in finance, areas increasingly relevant in today's aviation landscape. As a Representative of the Senate for the Science Faculty and AWS Student Ambassador, I've developed strong leadership and communication abilities while organizing technical events for hundreds of participants. My entrepreneurial experience founding 'Read the Vision,' a computer vision solution admitted to the HKSTP Ideation Programme, demonstrates my drive to use technology for meaningful impact.

What excites me most about Cathay is the opportunity to work alongside talented professionals who share a passion for aviation and continuous innovation. I thrive in environments that challenge me to grow, encourage learning, and provide opportunities to contribute to impactful projects. My experience collaborating with diverse teams, combined with my international perspective from my exchange semester at Nanyang Technological University, has prepared me well for Cathay's dynamic and collaborative culture.

I would be thrilled to contribute to Cathay's continued success and would welcome the opportunity to discuss how my technical background, leadership experience, and genuine passion for aviation can add value to your team. Thank you for considering my application.

Sincerely,

Felix Lau Pangestu
